ASTHMA MANAGEMENT POLICY

Asthma is a chronic health condition, which is one of the most common reasons for childhood admission to hospital. Correct asthma management will assist to minimise the impact of asthma. Children under the age of six usually do not have the skills or ability to recognise and manage their own asthma effectively. With this in mind, our Service recognises the need to educate its staff and families about asthma and to implement responsible asthma management strategies.

NATIONAL QUALITY STANDARD (NQS)

QUAL	QUALITY AREA 2: CHILDREN'S HEALTH AND SAFETY					
2.1.1	Wellbeing and comfort	Each child's wellbeing and comfort is provided for, including appropriate opportunities to meet each child's needs for sleep, rest and relaxation.				
2.1.2	Health practices and procedures	Effective illness and injury management and hygiene practices are promoted and implemented.				
2.2	Safety	Each child is protected.				
2.2.1	Supervision	At all times, reasonable precautions and adequate supervision ensure children are protected from harm and hazard.				
2.2.2	Incident and emergency management	Plans to effectively manage incidents and emergencies are developed in consultation with relevant authorities, practiced and implemented.

PURPOSE

The Education and Care Services National Regulations requires approved providers to ensure their services have policies and procedures in place for medical conditions including asthma management. We aim to create and maintain a safe and healthy environment for all children enrolled at the Service where all children with asthma can fully participate by ensuring all staff and educators follow our Asthma Management Policy and procedures and children's medical management plans.

SCOPE

This policy applies to children, families, staff, management, the approved provider, nominated supervisor, students and visitors of the Service.

DUTY OF CARE

We are committed to be an Asthma Friendly Service as outlined by Asthma Australia. This means:

- the majority of staff have current training in Asthma First Aid and routine Asthma management
- at least one staff member is on duty at all times children are in attendance at the Service who holds a current ACECQA-approved Emergency Asthma Management certificate
- Asthma Emergency Kits (AEKs) are accessible to staff and include in-date reliever medication, and single use spacers with masks for children under 5
- · Asthma First Aid posters are on display and information is available for staff and parents
- policies are Asthma Friendly

Source: Australian Children's Education & Care Quality Authority (acecqa.gov.au)

Our Service has a legal responsibility to take reasonable steps to ensure the health needs of children enrolled in the service are met. This includes our responsibility to provide

- a. a safe environment free from foreseeable harm and
- b. adequate Supervision for children.

Staff members, including relief staff, must have adequate knowledge of the signs and symptoms of asthma to ensure the safety and wellbeing of the children. Management will ensure all staff are aware of children's medical management plans and risk management plans.

BACKGROUND

Asthma is clinically defined as a chronic lung disease, which can be controlled but not cured. In clinical practice, asthma is defined by the presence of both excessive variation in lung function, i.e. variation in expiratory airflow that is greater than that seen in healthy children ('variable airflow limitation'), and respiratory symptoms (e.g. wheeze, shortness of breath, cough, chest tightness) that vary over time and may be present or absent at any point in time (National Asthma Council Australia, 2015, p.4).

Asthma affects approximately one in 10 Australian children and adults. It is the most common reason for childhood admission to hospital. However, with correct asthma management people with asthma need not restrict their daily activities. Community education assists in generating a better understanding of asthma within the community and minimising its impact.

Symptoms of asthma may vary between children, but may include wheezing, coughing (particularly at night), chest tightness, difficulty in breathing and shortness of breath. It is generally accepted that children under six years of age do not have the skills and ability to recognise and manage their own asthma without adult assistance. Our Service recognises the need to educate the staff and parents/guardians about asthma and to promote responsible asthma management strategies.

Asthma causes three main changes to the airways inside the lungs, and all of these can happen together:

- the thin layer of muscle within the wall of an airway can contract to make it tighter and narrower reliever medicines work by relaxing these muscles in the airways.
- the inside walls of the airways can become swollen, leaving less space inside preventer medicines work by reducing the inflammation that causes the swelling.
- mucus can block the inside of the airways preventer medicines also reduce mucus.

Legislation that governs the operation of approved children's services is based on the health, safety and welfare of children, and requires that children be protected from hazards and harm. Our Service will ensure that there is at least one educator on duty at all times who has current approved emergency asthma management training in accordance with the Education and Care Services National Regulations.

It can be difficult to diagnose asthma with certainty in children aged 0-5 years, because:

- episodic respiratory symptoms such as wheezing, and coughing are very common in children, particularly in children under 3 years
- objective lung function testing by spirometry is usually not feasible in this age group.
- a high proportion of children who respond to bronchodilator treatment do not go on to have asthma in later childhood (e.g., by primary school age).

ASTHMA AND COVID-19

There is no specific data as yet to suggest people with asthma are at greater risk of contracting COVID-19 however as this is a serious respiratory illness, anyone with asthma should implement strict hygiene measures to protect themselves and others.

Health practitioners have encouraged parents of children with asthma to:

- update their child's asthma medical management/action plan with their general practitioner
- QA2 Asthma Management Policy. Dropbox-Idc (by khairul) -Idc2022-Policy and procedure 2022

- ensure their child uses their reliever and preventer medicines (if required) as prescribed
- ensure their child continues taking medication to keep their asthma well controlled
- practice good hygiene and other measures to reduce contact with people who may be infected
- have their child tested for COVID-19 if they develop any symptoms (cough, fever, shortness of breath, sore throat)

(Asthma Australia, June 2020)

IMPLEMENTATION

We will involve all educators, families, and children in regular discussions about medical conditions and general health and wellbeing throughout our curriculum. The Service will adhere to privacy and confidentiality procedures when dealing with individual health needs. It is imperative that all educators and volunteers at the Service follow a child's medical management plan in the event of an incident related to a child's specific health care need, allergy, or medical condition.

Management, Nominated Supervisor/Responsible Person will ensure:

- that as part of the enrolment process, all parents/guardians are asked whether their child
 has a medical condition and clearly document this information on the child's enrolment
 record
- if the answer is yes, the parents/guardians are required to provide a medical management plan and signed by a registered medical practitioner prior to their child's commencement at the Service [see section below- In Services where a child is diagnosed with asthma]
- parents are provided with a copy of the Service's Medical Conditions Policy, Asthma
 Management Policy and Administration of Medication Policy upon enrolment of their child
- written consent is requested from families on the enrolment form to administer emergency asthma medication or treatment if required
- at least one educator or nominated supervisor with a current accredited first aid certificate, emergency asthma management and emergency anaphylaxis management certificate (as approved by ACECQA) is in attendance at all times education and care is provided by the Service as per Regulation 136(c)
- all staff members have completed ACECQA approved first aid training at least every 3
 years and this is recorded with each staff member's certificate held on the Service's
 premises

Star Kids Long Day Care And Preschool

- all educators have completed anaphylaxis management training and emergency asthma management training every two years
- · that all staff members are aware of
 - o any child identified with asthma enrolled in the service
 - o the child's individual medical management plan/action plan
 - o symptoms and recommended first aid procedure for asthma and
 - o the location of the child's asthma medication
- all staff members are able to identify and minimise asthma triggers for children attending the Service where possible
- upon employment at the Service all staff will read and be aware of all medical condition policies and procedures including this policy, maintaining awareness of asthma management strategies
- children with asthma are not discriminated against in any way
- · children with asthma can participate in all activities safely and to their full potential
- Asthma Australia's Asthma First Aid for posters are displayed in key locations at the Service
- that medication is administered in accordance with the Administration of Medication Policy
- that in the event of a serious incident such as a severe asthma attack, notification to the regulatory authority is made within 24 hours of the incident
- that when medication has been administered to a child in an asthma emergency, the parent/guardian of the child are notified as soon as is practicable or within 24 hours of the incident
- communication between management, educators, staff and parents/guardians regarding the Service's Asthma Management Policy and strategies are reviewed and discussed regularly to ensure compliance and best practice
- that updated information, resources, and support for managing asthma is regularly provided for families.

In Services where a child diagnosed with asthma is enrolled, the Nominated Supervisor/ Responsible Person will:

- meet with the parents/guardians to begin the communication process for managing the child's medical condition
- not permit the child to begin education and care until a medical management plan developed in consultation with parents and the child's medical practitioner is provided

- develop and document a risk minimisation plan in collaboration with parents/guardian [see Risk Minimisation Plan section]
- discuss with the requirements for completing an Administration of Medication Record for their child
- · ensure the medical management plan includes:
 - specific details of the child's diagnosed medical condition
 - supporting documentation (if required)
 - a recent photo of the child
 - triggers for asthma (signs and symptoms)
 - o list of usual asthma medicines including doses
 - response for an asthma emergency including medication to be administered
 - contact details and signature of the registered medical practitioner
 - o date the plan should be reviewed
- keep a copy of the child's asthma medical management plan and risk minimisation plan in the enrolment record
- ensure families provide reliever medication and a spacer (including a child's face mask, if required) whilst their child is attending the Service
- collaborate with parents/guardians to develop and implement a communication plan and communicate any concerns with parents/guardians regarding the management of their child's asthma whilst at the Service [see Communication Plan section]
- ensure that a staff member accompanying children outside the Service carries a copy of each child's individual asthma medical management action plan and required medication
- ensure an Administration of Medication Record is kept for each child to whom medication is to be administered by the Service
- ensure families update their child's asthma medical management/action plan regularly or whenever a change to the child's management of asthma occurs
- regularly check the expiry date of reliever medication and ensure that spacers and facemasks are cleaned after every use

Educators will:

- ensure they are aware of the Service's Asthma Management Policy and asthma first aid procedure (ensuring that they can identify children displaying the symptoms of an asthma attack and locate their personal medication and Asthma management/action plans)
- maintain current approved Emergency Asthma Management qualifications [recommended as best practice]

- ensure a copy of the child's medical management plan is visible and known to staff,
 visitors, and students in the Service
- be able to identify and, where possible, minimise asthma triggers as outlined in the child's asthma medical management plan and risk minimisation plan
- ensure the first aid kit, children's personal asthma medication and asthma medical management/action plans are taken on excursions or other offsite events, including emergency evacuations and drills
- administer prescribed asthma medication in accordance with the child's asthma medical management/action plan and the Service's Administration of Medication Policy
- complete the Administration of Medication Record whenever medication is provided to a child
- ensure any asthma attacks are clearly documented in the Incident, Injury, Trauma or Illness
 Record and advise parents as a matter of priority, when practicable
- communicate any concerns to parents/guardians if a child's asthma is limiting his/her ability to participate fully in all activities
- · ensure that children with asthma are not discriminated against in any way and
- ensure that children with asthma can participate in all activities safely and to their full potential, ensuring an inclusive program.

Families will:

- inform management and staff at the child's service, either on enrolment or on diagnosis,
 that their child has asthma
- read and be familiar with the Service's Asthma Management Policy
- provide a copy of their child's Asthma medical management/action plan to the Service ensuring it has been prepared in consultation with, and signed by, a medical practitioner
- develop a risk minimisation plan in collaboration with the Nominated Supervisor/Responsible Person and other service staff
- ensure all details on their child's enrolment form and medication record are completed prior to commencement at the Service
- provide an adequate supply of appropriate asthma medication and equipment for their child when they attend the Service
- provide an updated plan at least annually or whenever medication or management of their child's asthma changes
- communicate regularly with educators/staff in relation to the ongoing health and wellbeing
 of their child, and the management of their child's asthma

 encourage their child to learn about their asthma, and to communicate with Service staff if they are unwell or experiencing asthma symptoms.

If a child suffers from an asthma emergency the Service and staff will:

- Follow the child's asthma medical management/action plan
- If the child does not respond to steps within the Asthma medical management/action plan call an ambulance immediately by dialling 000
- Continue first aid measures
- Contact the parent/guardian when practicable
- Contact the emergency contact if the parents or guardian can't be contacted when practicable
- · Notify the regulatory authority within 24 hours

REPORTING PROCEDURES

Any incident involving serious illness of a child while the child is being educated and cared for by the Service for which the child attended, or ought reasonably to have attended a hospital e.g., severe asthma attack is considered a serious incident (Regulation 12).

- staff members involved in the incident are to complete an Incident, Injury, Trauma and
 Illness Record which will be countersigned by the Nominated Supervisor of the Service at the time of the incident
- o ensure the parent or guardian signs the Incident, Injury, Trauma and Illness Record
- place a copy of the record in the child's file
- the Nominated Supervisor will inform the Service management about the incident
- the Nominated Supervisor or the Approved Provider will inform Regulatory Authority of the incident within 24 hours through the NQA IT System (as per regulations)
- staff will be debriefed after each serious incident and the child's individual medical management plan/action plan and risk minimisation plan evaluated, including a discussion of the effectiveness of the procedure used
- staff will discuss the exposure to the allergen/trigger and the strategies that need to be implemented and maintained to prevent further exposure.

RISK MINIMISATION PLAN FOR A CHILD WITH DIAGNOSED ASTHMA

The staff, together with the parents/guardians of a child with asthma, will discuss and agree on a risk minimisation plan for the emergency management of an asthma attack based on the

child's asthma medical management/action plan. This plan will be included as part of, or attached to, the child's asthma medical management/action plan and enrolment record.

The plan will assess and minimise risks relating to the child's diagnosed health care need including any known allergens. Strategies for minimising the risk are developed and implemented.

The risk minimisation plan is to be updated whenever the child's medical management plan is changed or updated.

Common asthma triggers include:

- · viral infections- such as colds, flu and respiratory conditions
- · cigarette smoke
- physical exercise
- · allergens- mould, pollens, pets
- · irritants in the environment- dust, pollution, wood/bush fire smoke
- · weather- changes in air temperature or thunderstorms
- · chemicals and strong smells- perfumes, cleaning products
- stress or high emotions (including laughter or crying)

Betterhealth.vic.gov

COMMUNICATION PLAN

A communication plan will be created in accordance with our Medical Conditions Policy. The communication plan will be developed in collaboration with parents/guardians. It will detail the negotiated and documented manner to communicate any changes to the child's medical management plan and risk management plan for the child with relevant staff, educators, and volunteers.

Any changes to a child's medical management plan and risk minimisation plans will be documented in the communication plan.
